About Me

I'm a seasoned User Experience Designer with over 14 years of experience. I've had the privilege of working with international and local brands, gaining a deep understanding of user needs and market dynamics. My passion lies in user interface and product design, problem-solving, and creating compelling user experiences that drive business success. With a strong foundation in both creative and analytical aspects of UX design, I'm dedicated to crafting solutions that resonate with users and leave a lasting impact.

Experience

- 2024 - Present Day
  Sr. UX UI Designer
  Inalyze Bangladesh

  1. Conduct product research to understand user needs, market trends, and business objectives.
  2. Analyze data and user insights to inform design decisions, ensuring alignment with project goals.
  3. Develop information architecture, including sitemaps, to structure the system effectively.
  4. Create user personas and journey maps to visualize user behavior and enhance user experience.
  5. Leverage storytelling techniques to simulate real-life scenarios and improve user engagement.
  6. Translate insights into sketches and wireframes, establishing the foundational structure of the product or system.
  7. Collaborate cross-functionally with teams to plan, develop, and refine visual designs and interactive prototypes.
  8. Work closely with developers to ensure seamless design implementation and maintain design consistency.
  9. Continuously evaluate product performance, identifying opportunities for improvement through data-driven insights.
  10. Conduct usability testing to validate new concepts and optimize existing products for better user experiences.
  11. Manage project requirements, timelines, and team coordination, proactively addressing design and execution challenges.
  12. Mentor and support junior designers, fostering growth through guidance and skill development.
  13. Contribute to the team's and company's success by delivering impactful design solutions that drive business value.

- 2017 - 2023
